# 1 Introduction

## 1.1 Purpose

This document describes minor corrections on the list of specifications and data dictionary v2.0. The document clearly states the corrections. The original 2.0 documents have been updated to reflect the corrections.

## 1.2 Summary of changes

Additional clarifications to section 4.7 of the list of specifications.

Removal of the possibility to automatically deactivate a mobile machine part if it is only attached to the Machine ID that is being de-registered/de-activated.

## 2 List Of Specifications Corrigendum

Section 4.7 Recording and transmission of information on supply chain events:

- The parts in bold have been added:

Arts. 32 and 33 of CIR 2018/574 detail the reporting obligations on product movements, and on transactional events respectively, by requiring inter alia the following:

- *In the case of product movements, the responsibility for recording and transmitting the information shall lie with the economic operator that is in possession of the tobacco products. To that end, all the reporting activities shall use the identifier code of this economic operator. IT service providers may also transmit this information on behalf of the economic operator that is in possession of the tobacco products. **In this case, the IT service provider should use the identifier codes of the economic operator in possession of the products. If this is a manufacturer or importer, the IT service provider should transmit the information to the primary repository contracted by the manufacturer or importer. In all other cases, the IT service provider should transmit the information to the router.***
- *In the case of transactional information, the responsibility for recording and transmitting the information shall lie with the economic operator who is the vendor. To this end, all the reporting activities shall use the identifier code of this economic operator. IT service providers may also transmit this information on behalf of the economic operator who is the vendor of the tobacco products. **In this case, the IT service provider should use the identifier codes of the vendor. If this is a manufacturer or importer, the IT service provider should transmit the information to the primary repository contracted by the manufacturer or importer. In all other cases, the IT service provider should transmit the information to the router.***

Section 4.1.9.1 – De-registration of a Machine Identifier code

- Removed this sentence : « **If the Mobile Part is only linked with one Machine ID (the one that is being de-registered) then the Mobile Part shall be de-registered as well. »**
- Removed this sentence : « **if they are linked to more than 1 Machine. If the Mobile Machine Part is linked only to the Machine being deactivated, then it shall be automatically deactivated. »**

### 3 Data Dictionary Corrigendum

Section 3.4.9 DMA – (1.9) De-registration of machine identifier code:

- Removed the following sentences: ***“(…) because of this message if they are associated with multiple Machine IDs. If the mobile part is associated ONLY to the M\_ID that is being deregistered, then it shall be automatically deregistered.”***
